Construction and Panel Options

Premium IBEX Ideal for Heavy Clay & Rock Conditions

The premium IBEX Steel Panels are nothing less than extraordinary. Innovations in the steel making field have added quality to both material and design.

Our unique engineering and manufacturing process features the following:

- The maximum zinc coating available in pool manufacturing, which provides the best available corrosion protection.
- On larger panels we can have up to two i-Beam supports to strengthen the panels for clay and rock conditions.

Alpha Composite Ideal for High Water Table Areas

Composite materials are used in applications such as:

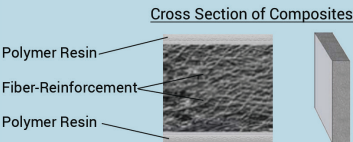

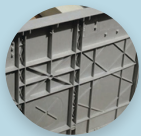

- Seawalls
- NASA's Spacecrafts
- Military Tanks

Our Composite Panels are a combination of polymer resin and fiber reinforced composites.

Some of the features include:

- Non-corrosive and salt resistant materials: a great option for high water table areas and saltwater pools
- Extremely durable material combined with highly engineered ribbing lends unrivaled strength to panel design.

Warrantees

Standard Construction

IBEX Construction

Structure

- Lifetime Material Warranty
- Pro-rated Reimbursement on Panels and Braces
- Removal, Freight and Reinstallation Included for One Year
- Non Transferrable

- 50 Years Material Warranty
